

Registration UK to Canada

1 Confirm Eligibility

Review the eligibility criteria on the ARB website and contact ROAC to begin the certificate application process.

2 Complete the ARB certificate application form

Having checked that you meet the eligibility requirements, you can complete your ARB certificate application form on the ARB portal. It usually takes around seven working days to process a certificate request and can take longer during periods of high demand. Please ensure you leave sufficient time for your request to be processed.

There is a fee of £80 payable to ARB for provision of a certificate.

3 ARB Certification

ARB will review your application and your qualifications. ARB will formally confirm that you are registered with ARB, are in good standing, and meet the relevant MRA requirements by issuing a certificate. Once ARB issues your certificate you will need to contact and send it to ROAC to begin the ROAC application process.

4 Complete your application process with ROAC

Once ARB has issued your certificate to you, and you have forwarded it to ROAC they will then contact you with details on the next steps to have your ROAC certificates sent to the Canadian province or territory where you are seeking registration. As part of the application process, you must complete four online modules covering practice areas specific to Canada such as seismic and climate-related code requirements. All four modules are less than 10 hours in total. There will be a brief knowledge check after each module. Comprehensive resource lists are also available in the modules for independent review and reference.
